

Peel force tester

---CPF-1000

Specifications:

Model	CPF-1000
Capacity of the force gauge	0-500g the tolerance: $\pm 0.1g$
Adjustable peeling speed	100-300mm/min
Adjustable peeling angle	165-180 degrees
Measurable width of tape	4-120 mm
Power source	AC 110V/220V,50Hz/60Hz
Measurable length of tape	Max.300mm
Dimensions	800mm*300mm*135mm
Weight	20kg

Features:

1. CPF-1000 accord with ELA-481 standard about the peel force test requirement to design, It's can control by manual or PC;
2. It's use Japan IMADA(500g) force test caput, the test value is well and truly;
3. The test value is use RS232 data signal to transmit, It's make sure the data conversion no error;
4. The software operate use windows, it's easy and convenient for operation, professional data format, the test outcome can't be revise;
5. It's can set sample data for time-lapse read, the test outcome is display in time, the force can set upper limit and lower limit, estimate automaticly, it's can print the test outcome;
6. It's can store the data, building the historical database;
7. The peel off speed use LCD to display;
8. It's can be doing the speciality design according to the customer's requirement.
